INTEGRATED STEREO AMPLIFIER  
E-250 The Accuphase E-200 series of  
basic integrated amplifiers enjoys an  
excellent reputation both in Japan and on  
the international stage. The E-250  
represents a full model change of the  
E-213, featuring the new AAVA-II  
volume control and reflecting the latest  
design technology advances achieved by  
Accuphase.

With the E-250 Accuphase is presenting  
the new integrated youngster. Explosive  
power may not be expected by hi-fi fans,  
but perhaps all the more a sterling sound?

The subject of this review is the Accuphase E-550 line-stage integrated amplifier. The phase-accurate Accuphase of Japan has been producing award-winning amplifiers since its founding in 1972, and that majestic power meter in gold chassis design has become the arresting visage of all Accuphase amplifiers shortly after. In fact, Accuphase believes that there will be adverse consequences if they ...

The E-250 uses the AAVA-II circuit for attenuation to control current, not voltage. This avoids the classic issue of impedance variations with volume setting. Below the acrylic display sit six small knobs and four switches to turn the E-250 into a system control center with many inputs and outputs. We get treble and bass controls plus balance.

Accuphase offers two amplifier technologies, Class A/B and Class A, with the Class A models positioned at the upper end of the product range in terms of performance and price. Until the recent introduction of the 50W E-800, the E-650 was the flagship integrated amplifier, offering a conservatively-rated 30W per channel into an 8 $\Omega$  load, doubling into 4 $\Omega$  and 2 $\Omega$  loads respectively.
