(FMEA), Measurement System Analysis (MSA), and Statistical Process Control (SPC). Statistical Process Control (SPC) is a method that uses control charts as a principal tool in the process of continual improvement. Control charts provide a scientific basis as to the presence or absence of special causes of variation.

Download Free Aiag Statistical Process Control

Statistical Process Control (SPC) is a method of measuring and controlling quality by monitoring the manufacturing process. Quality data is collected in the form of product, process measurement, and readings and is used to evaluate, monitor, and control a process. In 1930, the concept of Statistical Control was
