Cognitive Systems and the Extended Mind (Philosophy of ...

The book focuses specifically on the hypothesis of extended cognition, according to which human cognitive processes literally comprise elements beyond the boundary of the human organism. A systems-based approach is held to provide the only plausible criterion distinguishing what is cognitive from what is not.

Cognitive Systems and the Extended
Mind draws on a series of papers
published over the past ten years that
have been influential, but it is much
more than the sum of these past parts.
Bookended by introductory and
concluding chapters, its ten chapters
fall into three constituent parts. In Part
I, Rupert defends the idea that "the

cognitive systems. According to this understanding, extended cognitive systems are heterogenous, composed of brain, body, and niche, non-linearly coupled to one another. This view of cognitive systems, as non-linearly coupled brain–body–niche systems, promises conceptual and methodological advances. In this article we focus on two of these.

Cognitive Systems and the Extended
Mind by Rupert, Robert ...

In philosophy of mind, the extended
mind thesis says that the mind does
not exclusively reside in the brain or
even the body, but extends into the
physical world. The EMT proposes
that some objects in the external
environment can be part of a cognitive
process and in that way function as
extensions of the mind itself.

Examples of such objects are written
calculations, a diary, or a PC; in
general, it concerns objects that store
information. The EMT considers the
