### The Encyclopedia of Military Aircraft by Robert Jackson ...

There is enough content to cover every military aircraft in WW1, WW2 and modern era, but there is very little statistic info on each, some data are in error, and there is considerable lack of 3 view-diagrams and colored side drawings that are quite popular in such reference titles. Many aircraft are without a single photo as well.

Nonetheless, this book was a nice encyclopedic entry of military aircraft built from 1914 to the time this book was published. However, this volume didn't include helicopters or military airships, and it left out some Soviet and Chinese jet fighters, including the J-10.

### **The Encyclopedia Of Military Aircraft: Jackson, Robert ...**

A fighter aircraft, often referred to simply as a fighter, is a military fixed-wing aircraft designed primarily for air-to-air combat against other aircraft. The key performance features of a fighter include not only its firepower but also its high speed and maneuverability relative to the target aircraft.. The fighter's main tactical purpose is to establish air superiority over the battlefield.

### **The Encyclopedia of Military Aircraft by Robert Jackson**

A military aircraft is any fixed-wing or rotary-wing aircraft that is operated by a legal or insurrectionary armed service of any type. Military aircraft can be either combat or non-combat: Combat aircraft are designed to destroy enemy equipment using their own aircraft ordnance. Combat aircraft are typically developed and procured only by military forces. Non-combat aircraft are not designed for combat as their primary function, but may carry weapons for self-defense. These mainly operate in su

### **Military aircraft - Wikipedia**

The Illustrated Encyclopedia of Aircraft was a weekly partwork magazine by Aerospace Publishing that was published in the United Kingdom in the early 1980s. The magazine was intended to eventually make up a multi-volume encyclopedia dedicated to aviation. First issued in 1981, the partwork comprised 216 parts, each of 20 pages, making up 18 volumes. The first two issues were sold together for the price of one, subsequent issues were sold on their own. Empty binders for each volume were also sold

including performance data and information on special features

This book provides a fascinating at a glance guide to every major military aircraft type ever flown, all illustrated with a detailed profile artwork, accompanied by details and specifications listing dimensions, powerplant, weights, armament, and performance. Arranged chronologically by type or theatre to allow easy comparison, like each title in the Visual Encyclopedia series, each featured aircraft or variant in this book is illustrated with an excellent full color artwork, showing in great detail its characteristics and markings, and completed with an informative caption. Many aircraft are illustrated in profile, and others in a three quarter view. This book features all of the most famous aircraft from around the world, such as the Supermarine Spitfire, Junkers Ju 87 Stuka, North American Aviation F-86 Sabre, and McDonnell Douglas F-4 Phantom. With over 1000 outstanding color illustrations and photographs, this is an authoritatively researched book that celebrates the many diverse designs of more than a century of military aviation.

Covers "800 types in all ... with 1,706 airplanes shown in color, 16 color charts, 252 photographs, 772 cutaway drawings and seven color diagrams."
