In every era, global progressive thinkers have used creativity as a means for cultural reformation and social justice in response to oppressive regimes. For example, theater, cartoons, social art, film, and other forms of representative arts have always been used as critical instigation to create agency or critical commentary on current affairs. In the education sector, teachers in schools often say one of two things: they are not creative or that they don't have the time to be creative given the curricular demands and administrative mandates that they are required to follow. Each day, educators are working to find exceptionally creative ways to engage their students with limited resources and supplies, and this becomes even more of a challenge during turbulent times. Creativity as Progressive Pedagogy: Examinations Into Culture, Performance, and Challenges primarily focuses on pedagogical creativity and culture as related to various aspects of social justice and identity. This book presents experience-based content and showcases the necessity for pedagogical creativity to give students agency and the connections between cultural sensitivity and creativity. Covering topics such as the social capital gap, digital spaces, and underprivileged students, this

"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.
