□A passionate, incisive critique of the many ways in which women and girls of color are systematically erased or marginalized in discussions of police violence. □Michelle Alexander, author of *The New Jim Crow Invisible No More* is a timely examination of how Black women, Indigenous women, and women of color experience racial profiling, police brutality, and immigration enforcement. By placing the individual stories of Sandra Bland, Rekia Boyd, Dajerria Becton, Monica Jones, and Mya Hall in the broader context of the twin epidemics of police violence and mass incarceration, Andrea Ritchie documents the evolution of movements centered around women□s

Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States

report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. Social Isolation

and Loneliness in Older Adults summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. Social Isolation and Loneliness in Older Adults considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

In 1656, a Maryland planter tortured and killed an enslaved man named Antonio, an Angolan who refused to work in the fields. Three hundred years later, Simon P. Owens battled soul-deadening technologies as well as the fiction of "race" that divided him from his co-workers in a Detroit auto-assembly plant. Separated by time and space, Antonio and Owens nevertheless shared a distinct kind of political vulnerability; they lacked rights and opportunities in societies that accorded marked privileges to people labeled "white." An American creation myth posits that these two black men were the victims of "racial" discrimination, a primal prejudice that the United States has haltingly but gradually repudiated over the course of many generations. In *A Dreadful Deceit*, award-winning historian Jacqueline Jones traces the lives of

Antonio, Owens, and four other African Americans to illustrate the strange history of "race" in America. In truth, Jones shows, race does not exist, and the very factors that we think of as determining it—a person's heritage or skin color—are mere pretexts for the brutalization of powerless people by the powerful. Jones shows that for decades, southern planters did not even bother to justify slavery by invoking the concept of race; only in the late eighteenth century did whites begin to rationalize the exploitation and marginalization of blacks through notions of "racial" difference. Indeed, race amounted to a political strategy calculated to defend overt forms of discrimination, as revealed in the stories of Boston King, a fugitive in Revolutionary South Carolina; Elleanor Eldridge, a savvy but ill-starred businesswoman in antebellum Providence, Rhode Island; Richard W. White, a Union

veteran and Republican politician in post-Civil War Savannah; and William Holtzclaw, founder of an industrial school for blacks in Mississippi, where many whites opposed black schooling of any kind. These stories expose the fluid, contingent, and contradictory idea of race, and the disastrous effects it has had, both in the past and in our own supposedly post-racial society. Expansive, visionary, and provocative, *A Dreadful Deceit* explodes the pernicious fiction that has shaped four centuries of American history.
