symptom. Again not a big deal. Plenty of zip in the few I have driven.

I don't own a MBE but I run 3126 CATS and if your breaking air or running grades in warmer climates I would be looking for more. My experience about the same weight, when I'm running grades in AZ or MT it's working hard to keep the speed limit (3126B Tagged 300 HP and chipped, Alison MD3060, 4:80 rear, 43' horse trailer).

The head gasket on this 2008 Mercedes MBE 900 diesel engine has failed. That's the least of possibilities. Another option would be a cracked head but I'm staying optimistic. One thing for sure the top end of these diesels are very tough and I'm betting my money on the head gasket being the main problem.
