Supine
percutaneous
nephrolithotomy
(PCNL) has been
described in
1988 and several
modifications
followed since.
Despite claimed
benefits, supine

Acces PDF

Supine

PCNL is still neglected by the majority of urologists.

New Way Of Interpreting Pnl

PNL is the gold standard for the management of large and/or otherwise complex renal stones. Since

Acces PDF

Supine

its introduction
in the seventies
PNL has
undergone
considerable
evolution,
mainly driven by
the improvement
in access
techniques,
endoscopic
instrument
technology,
lithotripsy

Acces PDF

Supine

devices and drainage management. The conventional prone position for PNL has been challenged in the last two decades by a variety of modifications, including the supine and Galda kao-modified

Acces PDF

Supine

Supine Valdivia
positions, which
make
simultaneous
retrograde
working access
to the
collecting
system possible
and have proven
anesthesiologica
l advantages.
The Galdakao-
modified supine

Acces PDF

Supine

Valdivia
position allowed
the development
of ECIRS
(Endoscopic
Combined
IntraRenal
Surgery), a
technique
exploiting a
combined
antegrade and
retrograde
approach to the
