Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T

was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

These are some of the stories of my life – just your average Englishman (pommie) – beginning from birth, childhood, schooldays, adolescence and then service life with its world travels, through to leaving the Royal Air Force and England to re-unite with my family in Australia after almost five years. It continues on with my life and travels again during and after my (officially) 21 years of marriage to an Australian lady and my 34 years of residency, citizenship and family life there... This book is a presentation of my true-life experiences and was mainly written in stages and in many countries over the years (1967 – 2014). It is compiled in short-story, poetry and travelling diary formats, with images supplied, and includes light-hearted and humorous events in my life as well as the serious side. Riding life's roller-coaster comes much easier with a good sense of humour. Cheers.

Esta obra abarca todo cuanto se refiere a la organización y gestión en el ámbito de la producción u operaciones llevadas a cabo de acuerdo con los más avanzados sistemas de gestión y abarcando todos los aspectos involucrados: ingeniería, modelos de gestión actualmente utilizados —especialmente el lean manufacturing—, diseño de los procesos y plantas de producción, maquinaria y sistemas automatizados, así como todos los aspectos relacionados con la calidad, el mantenimiento y la logística, incluyendo también la gestión de los proyectos industriales y los aspectos de costes, inversiones y financiación que precisa la actividad productiva. La producción es una función empresarial de gran importancia para que las empresas obtengan buenos resultados, ya que es en los procesos de producción donde la empresa genera su mayor o menor valor añadido al producto, el cual es precisamente la fuente del beneficio obtenido. El libro abarca todo tipo de operaciones, sean industriales o de servicios, y es especialmente relevante el énfasis que esta obra hace en las metodologías más actuales, ya que se han producido grandes cambios debidos a la evolución de nuestra sociedad y, en especial, a la de los mercados y el comportamiento de los consumidores, en las últimas décadas. Estos cambios han desembocado en un nuevo enfoque de gestión conocido como Lean, caracterizado por un mejor aprovechamiento de los recursos y una mayor flexibilidad para adaptarse a las exigencias variadas y cambiantes de los mercados. Se ha reunido, pues, en un tratado único, los conocimientos que permiten al lector ponerse al día en lo concerniente a la organización y gestión de los sistemas productivos y sus distintas áreas de gestión, de forma que pueda decidir cómo orientar la gestión en todos estos aspectos y alcanzar, así, lo que deberá ser el objetivo de toda la gestión empresarial: obtener el mayor grado de eficiencia y competitividad posible.
